	The fight against the Underground must be conducted by infiltration and complete intelligence about their leadership after which they will be destroyed.			
	To fight the Und	erground two diffe	rent methods will	be adopted:
	a. The most ruthless action will be used against the Underground Staffs by extermination and destruction of their property. It is imperative to understand that these people are our greatest enemy and will never work loyally with us.			
	b. Those of the opposition and of the Fascist organization the have gone along with us at the very beginning of our democratic popular build-up and those who came out during the first amnesty declared by the Government and who since are occupied in useful work, have joined the party and are loyally working with us, those will be left alone.			
	c. Toward those who are ordinary members and are nothing but pawns mild treatment will be used and if they are willing to become informers, lemiency and discharge from prison will be adopted. The public will be persuaded of the uselessness of Underground action. Thus its bases will be cut off.
